PROFESSIONAL SUMMARY

I am an Automation Engineer with 11+ years of experience in CAD design, design automation, and product data management. Expert in SOLIDWORKS Routing (piping & tubing), DriveWorks rules-based automation, and SOLIDWORKS PDM administration/workflows. Recognized for delivering complex VS-series tank programs, standardizing drawing practices to reduce red lines, mentoring engineers, and enabling faster, higher-quality releases across global teams.

CORE SKILLS

- SOLIDWORKS (CAD, Routing, API/VBA/.NET)
- DriveWorks (Xpress/Solo) automation
- SOLIDWORKS PDM (admin, workflows, vault templates)
- BOM management & ECR approval packs
- GD&T, Fixture & Tooling design

CERTIFICATIONS

- Certified SOLIDWORKS Professional (CSWP – Mechanical Design)
- Lean Six Sigma Green Belt (LSSGB)

PROFESSIONAL EXPERIENCE

Automation Engineer | Chart Industries (VRV Asia Pacific Pvt Ltd), Hyderabad | Nov 2023 – Present

- Delivered bottle assemblies; advanced VS-series tank programs and met release milestones.
- Implemented DriveWorks rules (e.g., HHLO part automation) and macro workflows to reduce repetitive effort and enforce design uniformity.
- Authored and delivered SOLIDWORKS Routing – Phase-1 training; published completion reports and query sessions adopted by HYD COE.

Senior Mechanical Design Engineer | Jaydu LLC | Mar 2021 – Oct 2023

- Designed and developed custom utility trailers; optimized conveyor systems for throughput and reliability.
- Led reverse-engineering initiatives for cost and performance improvements; prepared manufacturing drawings and documentation.
- Collaborated with cross-functional teams to validate designs and align with customer specifications.

Assistant Manager – Tooling | AVTEC India Pvt Ltd | Aug 2018 – Jan 2021

- Led VAVE initiative achieving 43% savings over target (₹8.6 lakh vs ₹6 lakh goal); drove measurable cost reduction.
- Engineered welding fixtures improving weld quality and reducing production time by 50%.
- **Technical Expertise** – Apply in-depth knowledge of industrial gearboxes, casting, forging, sheet-metal fabrication, fittings, and fasteners to design, evaluate, and improve mechanical assemblies.
- **Gearing Design** – Engineer and select appropriate gearing solutions (helical, bevel, worm, etc.) for diverse applications, ensuring optimal performance, durability, and cost-effectiveness.
- **Manufacturing Oversight** – Coordinate with production teams to align manufacturing processes with design specifications, troubleshoot fabrication issues, and drive continuous-improvement initiatives.
- **Team Leadership** – Prioritize and delegate tasks for the engineering team in a fast-paced environment, maintaining clear timelines and a sense of urgency to meet project milestones.
- **Project Management** – Develop, track, and adjust action plans for technical projects, managing resources, budgets, and risk assessments to ensure on-time delivery.

Design Engineer | DRDL Hyderabad | Nov 2016 – July 2018

- Developed production fixtures and tooling aligned to GD&T and manufacturability requirements.
- Partnered with manufacturing teams to validate fixtures, reduce setup times, and improve throughput.

Fixture Design Engineer | Makino India Pvt Ltd | Oct 2015 – Oct 2016

- Developed production fixtures and tooling aligned to GD&T and manufacturability requirements.
- Partnered with manufacturing teams to validate fixtures, reduce setup times, and improve throughput.

EDUCATION

- Master's Degree in Tool Design — Osmania University (2014 – 2016)
- B.Tech in Mechanical Engineering — B V Raju Institute of Technology (2011 – 2014)
- Diploma in Mechanical Engineering — State Board of Technical Education & Training (2008 – 2011)

TECHNICAL TOOLS

- CAD: SOLIDWORKS, Inventor, NX, AutoCAD
- Automation: DriveWorks (Xpress/Solo), SOLIDWORKS API (VBA/.NET)
- PDM: SOLIDWORKS PDM (admin, workflows, vault templates, search, BOMs)
- Documentation: eDrawings, Microsoft 365 (Excel/Word/PowerPoint)
